

# Mastership trainings

On January 23, an exciting workshop on the theme "Scientific Articles and Terms of Writing Thesis" was held. The lecturer was PhD Tuloboev A. K. He presented interesting information about writing articles to students through the slide. The article mentions the preparation of the article based on IMRad (introduction, methods, results, and discussion) format. Of course, these sciences will greatly assist our students in future academic activities.

Iskandarov Hayitboy, the leader of the Youth Union of the Faculty of WOTE
