

SCIENTIFIC WORKS

In the 2018-2019 academic year, the department completed the state-of-the-art research on "Improve accounting and document flow in water management organizations" (total cost of 25 million soums). There are plans for research on R & D, guideline, work schedule and annual calendar plans. The teachers of the department published 45 scientific articles on the results of the research, prepared the final report on the R & D.
