Economist Command

A young teacher of the Faculty of Economics organized a small course "Innovative projects in the sectors of the economy" for 3rd year students of the faculty, and in 2021 the Economist team was created. At the initial stage, a team consisting only of third-year students was formed. At the next stage, it is planned to attract other courses.

1. Regularly participates in the analysis of monographic research within the framework of the project "Interdisciplinary Laboratory of Agrarian Innovations and Resources", funded by the World Bank. At the same time, such works as the creation and conduct of a survey, the generalization of survey data were performed.

2. The project of Nusratullayeva Farida from among the team members was selected for the program "Business Incubator", which was developed jointly with the innovation and technological park "Yashnobad" under the Ministry of Innovative Development of the Republic of Uzbekistan, and was accepted among 50 projects as a project that passed all stages of selection and was accepted for the training course, graduated with a certificate.

3. Members of the "Economist" team took part in the Ministry of Innovative Development of the Republic of Uzbekistan, the Academy of Banking and Finance, M-Factor and other motivational conversations. In the next academic year, plans and goals are defined and the team will be expanded with the first and second courses.

To become a member of the Economist circle, please call +998977209992 berdimurodov72@gmail.com.

4. The department has a work plan of the student scientific society. 11 students were involved in the student scientific society. The results of scientific work performed by students are presented at student scientific conferences. 71-237-19-58 to join the circle.

5. In cooperation with the Humboldt University of Germany, an international course "Methodology of Interdisciplinary Advanced Research" was organized at the Department of Economics. In addition, a fundamental project is being implemented in cooperation. Together with Nazarbai, the University of Kazakhstan organized an international course "Management of natural resources and its economy"ka", within the framework of which a base of educational and methodological materials has been formed. In cooperation with the IAMO University of Germany, seminars and trainings were organized on the topics "Academic writing and publication of articles in prestigious scientific journals", "Introduction of modern technologies in agriculture". In cooperation with the Tashkent University of Westminster, the course "Applied Econometrics and STATA" was organized, within the framework of which a database of educational and methodological materials was formed.
